About Cargill Beauty

Cargill Beauty, the personal care division of Cargill, offers a diverse portfolio of nature-derived ingredients, an integrated and responsible supply chain, state of the art research and application services and endless possibilities to support the sustainable growth of personal care brands. Cargill Beauty's portfolio is composed of texturizers, emollients, emulsifiers, sensory enhancers and bio-actives to develop nature-derived products for skin care, hair care, oral care and make-up.

Sustainability

Connecting our global supply chains to provide solutions from farm to face

Today's consumers are better informed when making beauty product choices. They want to know where their product comes from, how it is produced, what's in it and to make sure it has been produced with respect for the welfare of people and the planet. At the same time, they won't compromise on performance. Building a strong story behind their brands is therefore a key priority for personal care manufacturers, in order to maintain or regain consumers' trust. Cargill Beauty uses nature-derived ingredients, champions a responsible supply chain and has fully integrated processes and applications to meet that demand. Over the past years, we have made a range of commitments, specifically targeting the sustainable development of our supply chains.

Red Seaweed Promise™

To help ensure a long-term sustainable red seaweed supply chain, Cargill has launched the Red Seaweed Promise™ in 2019. The program is specifically designed to address key sustainability challenges for the harvesting and cultivation of red seaweed, while enhancing producer livelihoods, supporting local communities and protecting and enhancing marine and coastal ecosystems such as coral reefs and mangroves.

Waxy Corn

At Cargill Beauty, waxy corn sourcing is 100% from Europe, mainly from France and verified externally against the Farm Sustainability Assessment criteria to Sustainable Agriculture Initiative (SAI) Silver Level. This ensures that the farmers are working the fields using good agricultural practices and taking measures to protect the soil, water quality and biodiversity.

Cocoa Promise™

The Cargill Cocoa Promise™ is our commitment to farmers and their communities, enabling them to achieve better incomes and living standards while growing cocoa sustainably.

Our ambition is to accelerate progress towards a transparent global cocoa supply chain, to enable cocoa farmers and their communities to strengthen their socioeconomic resilience, and to deliver a sustainable supply of cocoa and chocolate products from bean to end-product.

Third-party Certified Cocoa

Contributes to improving the sustainability of the cocoa sector

It ensures cocoa is produced according to internationally recognized and independent standards for sustainable production through a set of requirements. Third-party certified cocoa also verifies the supply chain to ensure a level of traceability. It makes a standard, yet meaningful contribution in a sustainable cocoa supply chain, and foster transparency and responsibility.

Cargill's sustainable cocoa beans are third-party verified by UTZ and the Rainforest Alliance, which merged in 2018 to form a new standard named after Rainforest Alliance.

Their main sustainability goals are mitigating and adapting to climate change, protecting the environment and preserving biodiversity.

Jojoba Promise™

The Jojoba Promise™ is our sustainable sourcing program for Jojoba, with the purpose to improve the sustainability of Jojoba cultivation at global scale through our activities for the personal care industry. To build the Jojoba Promise™, Cargill has partnered with Greenflex to perform a risk analysis of the Jojoba supply chain, interview jojoba suppliers and study the expectations of consumers and personal care manufacturers. The Jojoba Promise™ focuses on 3 key areas: Resilient Farmers & Communities, Sustainable Water Use and Traceability.

Coconut Oil

Cargill has pioneered a sustainability standard in Philippines since 2011. The mass balance program engages 1,100 farmers and is certified by the Rainforest Alliance. Farmers benefit from improved yields, income growth and diversification, and greater market access—all contributing to farmer prosperity.

Emollients																	
Light Oils	Florasun® 90	Helianthus Annuus (Sunflower) Seed Oil		USA	Derived Natural	100		√	√		Elegant skin feel, especially suited for pro-oxidative environments, low odor, low color	x	x		x	x	x
	Floramac® Macadamia Oil Refined	Macadamia Integrifolia Seed Oil		USA	Derived Natural	100		√			Composed of fatty acids similar to those found on human skin, provides an elegant and cushiony skin feel	x	x		x	x	x
	Floralipids® Moringa Oil Refined	Moringa Oleifera Seed Oil		USA	Derived Natural	100		√			Rich in oleic and behenic acid, extremely oxidatively stable, skin soothing	x	x		x	x	
Butters	Refined Shea Butter (PC)	Butyrospermum Parkii (Shea) Butter		Netherlands	Derived Natural	100		√	√	√	High stability emollient with skin conditioning, masking and perfuming properties	x	x		x	x	
	Refined Organic Shea Butter (PC)																
	Refined White Cocoa Butter - PC	Theobroma cacao seed butter (EU) Theobroma cacao (cocoa) seed butter (US & China)		Netherlands	Derived Natural	100		√	√	√	Quick melting at application Medium-light afterfeel	x	x		x	x	
	Sustainable Cocoa Butter																
	Floralipids® Moringa Butter	Moringa Oil/Hydrogenated Moringa Oil Esters		USA	Derived Natural	100		√			Enhances skin barrier repair, long lasting moisturization, increase stick strength	x	x		x	x	x
	BotaniButter™	Behenyl/Oleyl Behenate/Oleate Esters		USA	Derived Natural	100		√	√		Smooth sensorial, increased hydration, improved barrier protection & repair, helps reduce irritative redness	x	x		x	x	x
Paste	Agri-pure™ AP-620	Hydrogenated Coconut Oil		Germany	Derived Natural	100		√	√	√	Melting at application Medium-rich afterfeel High oxidative stability	x	x		x	x	x
	Agri-pure™ AP-660	Hydrogenated Rapeseed Oil		Germany	Derived Natural	100		√	√	√	Gives strong consistency Rich & cushiony afterfeel	x	x		x	x	x
NEW	Floramac® 10	Ethyl Macadamiate		USA / Canada	Derived Natural	99.95					Multifunctional dry emollient with high spread and skin feel similar to many light silicone derivatives	x	x		x	x	x
	BotaniDesign™	Hydrogenated Vegetable Glycerides		USA	Derived Natural	100		√	√		Multifunctional dry emollient with high spread and skin feel similar to many light silicone derivatives	x	x		x		x
	CocoaDesign™ L	Cocoa Butter Ethyl Esters		USA	Derived Natural	100		√	√		Dry liquid, light texture, sunscreen solubilizer, pigment wetting/dispersing, good oxidative stability, non-comedogenic evokes positive emotion	x	x		x	x	x
	CocoaDesign™ S	Hydrogenated Cocoa Butter Ethyl Esters		USA	Derived Natural	100		√	√		Rich texture, adds cushion, improves hydration, good oxidative stability, non-comedogenic evokes positive emotion	x	x		x	x	x
	Floraesters® 15	Jjobba Esters		USA	Derived Natural	100		√			Delivers the benefits of jojoba oil, with enhanced stability, color and odor for personal care applications	x	x		x	x	x
	Floraesters K-20W® Jojoba	Hydrolyzed Jojoba Esters (and) Water (Aqua)		USA / Canada	Derived Natural	100		√			Film-forming esters that provide jojoba emolliency, high substantivity, improved hydration, and hair dye enhancement	x	x		x	x	x
	Floraesters® 20	Jjobba Esters		USA / Canada	Derived Natural	100		√			Luxurious skin feel, with a melt point slightly above skin temperature, oxidatively stable, improves skin barrier function, improves skin hydration	x	x		x	x	x
	Floraesters® 30	Jjobba Esters		USA / Canada	Derived Natural	100		√			Non-greasy skin feel, with a melt point above skin temperature, oxidatively stable, improves skin barrier function, improves skin hydration	x	x		x	x	x
	Floraesters® 60	Jjobba Esters		USA / Canada	Derived Natural	100		√			Non-greasy skin feel, with a melt point above skin temperature, oxidatively stable, improves skin barrier function, improves skin hydration	x	x		x	x	x
	Floraesters® 70	Jjobba Esters		USA	Derived Natural	100		√			Hard, white wax, delivered as free-flowing particles. Increases stick strength	x	x		x		x
Floraesters K-100® Jojoba	Hydrolyzed Jojoba Esters (and) Jojoba Esters (and) Water (Aqua)	USA / Canada		Derived Natural	100		√				Film-forming esters that provide jojoba emolliency, high substantivity, improved hydration, and hair dye enhancement	x	x		x	x	x
Floraesters® IPJ	Isopropyl Jojobate (and) Jojoba Alcohol (and) Jojoba Esters	Canada		Derived Natural	92						Dry emollient exhibiting superior pigment wetting and binding properties with a light, non-greasy skin feel	x	x		x		x
Skin lipid mimetic																	
	Jojoba Oil/Macadamia Seed Oil Esters (and) Squalene (and) Phytosterols (and) Tocopherol		USA	Derived Natural	100		√			Patented botanical complex. Delivers the skin surface lipid profile of a healthy young adult.	x			x			

1: Derived natural according to ISO 16128-1:2016 and ISO 16128-2:2017

2: According to OECD 301 B or OECD 302, for combination: each ingredient is readily biodegradable

3: Cosmos standard v4, January 2024

4: Responsibility of a vegan claim lies with the cosmetic manufacturer. Please consult your own legal or regulatory experts to ensure suitability of the product with your preferred standard

5: Certified by a competent organization

6: range of naturalness based on type and level of pigment loading

7: range of naturalness depending on used additives

* According to literature, evaluation pending

** Only some grades are certified
